

Is the Sun a planet or a star? How long is a day on Venus? Can a planet be made of gas? How big is the Milky Way? *Space, Stars and Planets* answers these questions and many more. It includes:

- full-colour photographs
- diagrams explaining patterns and structures in the universe
- informative and fun text
- activities to test your knowledge
- a glossary to explain words
- an index
- a list of other books and websites where you can learn more.

Steve Massey is a writer, speaker and an associate member of the Astronomical Society of Australia. He is widely published, with books including *Exploring the Moon*, *The Night Sky*, *How Does the Night Sky Work?* and *Atlas of the Southern Night Sky*. The asteroid 14420 (Massey) was named in his honour.
